LOW MOQ

8 TYPES FOR EACH DEVICE

OLEOPHOBIC LAYER

MADE IN EUROPE

8 screen protection technologies for each device

Each offering different special features and a different level of protection against scratches and impacts.

HYBRID | HARD | IMPACT | HYBRID F+ | MATTPRO | FLEXI+ | NOBACTERIA | PRIVATE

8 REASONS WHY YOU MAY NEED IT

1. SCRATCH PROTECTION

Similar protection level to tempered glass but lasts up to 10 times longer on screen. Does not crack, crumble on edges, nor pull air on sides. More cost effective.

Recommended types: HYBRID | HARD | HYBRID F+

2. REFURBISH USED SCREENS

Its unique structure fills small and medium scratches, making them invisible after installation. Efficient way to fix a screen transparency, without exchanging it to new one.

Recommended types: FLEXI+

3. ANTI-SHOCK PROTECTION

Helps protecting the screen from breaking when the device drops or gets hit. Elastic layer absorbs impacts and distributes it throughout entire surface.

Recommended types: IMPACT

4. CURVED SCREEN PROTECTION

Technology dedicated to protect curved displays. Most of screen protectors can be used on flat screen surfaces only, leaving curves uncovered. Duratis Flexi+ protects 100% of curved display.

Recommended types: FLEXI+

5. HYGIENIC PROTECTION

Helps reducing up to 99% of bacteria on the screen surface. Plus, it offers standard screen protection features. Recommended in healthcare and food environments.

Recommended types: NOBACTERIA

6. PRIVACY PROTECTION

Protective film with a special privacy layer which hides the screen content from bystanders and data breach. Eagerly used by the police, banks, healthcare units – where privacy is crucial.

Recommended types: PRIVATE

7. ANTIGLARE PROTECTION

Screen protective film reducing most of light reflections. Recommended when the display is exposed to sunlight or electric light sources. Makes content easy to read.

Recommended types: MATTPRO

8. TEXT OR LOGO ON THE SCREEN

Branding or functional communication is an added value to screen protection. Allows adding a logo on the display as well as any other text like: “tap here”, “scan here”, or marking a digit for accessibility.

Recommended types: HARD | NOBACTERIA

More cost-effective than glass

Duratis screen protectors are **more cost effective** than glass screen protectors. They **last longer, do not crack,** and **do not crumble at the edges**. They also offer **additional features** such as Anti-Shock, Anti-glare or Privacy Filter.

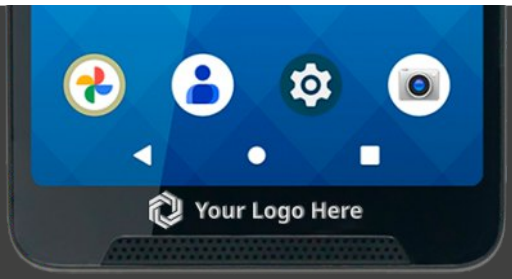

Tempered glass screen protectors

- High scratch protection level
- Less cost-effective
- Shorter durability
- Cracks and crumble on the edges
- Pulls air on sides

Duratis™ Screen Films

- High scratch protection level
- More cost-effective
- Lasts up to 10 times longer
- Does not crack or crumble on the edges
- Does not pull air on sides

Custom Screen Protectors with Logo Engraving
