Material Options

GENUINE LEATHER

Durable and natural material designed for work in harsh conditions. Double cowhide of Polish origin, chrome-tanned to a thickness of 1.2–1.4 mm. The leather's characteristics prevent fraying along the edges and ensure very high resistance to tearing and ripping. The durable dyeing technology ensures long-lasting aesthetic properties of the surface..

Material Option 1: Genuine Leather

HYBRID TEXTILE DIAMOND

Modern hybrid material composed of 60% polyamide yarn and 40% polyurethane coating. The composite bonding of layers under high pressure provides very high durability against operational factors. The applied technology prevents fraying at the edges of cuts. The outer coating features an aesthetic texture resembling rubber to the touch, ensuring a secure grip in hand.

Material Option 2: Hybrid Textile Diamond
